

**Syllabus - Distance learning**  
**General Medicine**  
**Week 6**

a) Preparation of presentations on specific topics (ie. selected the by students in addition to the presentation of semester work.  
Instead of (or in addition to) PowerPoint-presentation) students prepare the topic they have chosen as a written report (.doc, .pdf). Report (4 pages) is to be send to the teacher who saves them to group folder. These can be collected by one student and send to teacher as zip file for convenience.

b) Self-study of a new topics :

- a. Motor system - neurophysiology, role of spinal cord, brain-stem, cerebellum, basal ganglia, cortex; Disorders: paralysis, extrapyramidal syndromes, neuromuscular disorders, myopathies
- b. Sensory system - somatosensory disorders

c) Other tasks as instructed by the teacher.

Presence in a virtual class. One of the group students have to write a list of students (name and surname) who responded, read the instructions and duties for a week and were virtually present in a class. (In case they do not respond they are considered to be absent).

The list of presence in a distant study for the 6th week (Group.... )

1. Name Surname ...
